Carbon Nanotube Technology

RV WINDSHIELD PROTECTION

Maxxgard®'s Windshield Protection is an advanced multi-step, professionally applied system for your new RV's windshield.

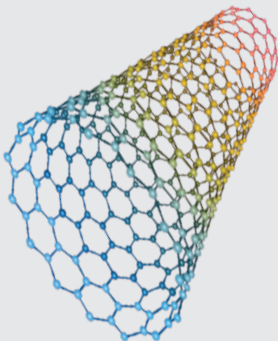

Treated glass showed more than a 32% increase in break strength (Tests performed: ASTM C 1499).

- Our advanced windshield protection is backed by a fully insured limited warranty.
- Providing repair of minor chips & cracks to front windshield.
- Coverage includes windshield replacement for non-repairable damage.
- Network provider will meet you at a convenient location to repair or replace the damaged windshield.
- All new, pre-driven, and lease vehicles qualify.

Carbon Nanotube Technology

Our cutting edge windshield protection formula combines advanced water repellency with carbon nanotube technology for increased glass strength and visibility.

Our state-of-the-art water repellency products prevent dirt, grime, and small insects from sticking to the surface of your windshield.

Carbon Nanotube technology gives your windshield increased resistance to impact and pressure in turn, limiting damage from everyday driving mishaps.

A carbon nanotube is a unique type of molecule which possesses a tensile strength approximately 100 times greater than steel.
